

Uri Geller:

## OPEN LETTER TO RISHI SUNAK

To Prime Minister Rishi Sunak and the government of Great Britain:

As a British citizen I am deeply concerned that your decision to supply depleted uranium munitions to Ukraine could have **CATASTROPHIC CONSEQUENCES** both for the people of the UK and Ukraine itself. I know you are rightly trying to help the Ukrainians **BUT** I have an ominous feeling that this could backfire **BADLY**.

You are playing with fire. The warning signs are there. Putin is out of control. Ignore his threats at your peril. He says he is ready to respond accordingly - and he is talking about a nuclear option! It doesn't matter that Foreign Minister James Cleverly says the supply of the munitions does not amount to nuclear escalation or a threat to Russia - what matters is how **RUSSIA** sees it - and Russia feels threatened! Do not give Putin a reason to resort to tactical nuclear weapons - which I am telling you now **HE WILL DO**. Russian state TV has said loud and clear that Russia's Poseidon nuclear missile could trigger a 500-metre tsunami which would wipe out the UK. This is not rhetoric - this is real. I am telling you this because I am concerned for the safety of people everywhere and especially Britain, which I hold dear. The British nation could be wiped out at the touch of a button and Putin is willing to do it. Do not forget, I know his mind! Even without a nuclear war, the environmental damage from these exploding munitions could be devastating! Radiation poisoning, birth defects and cancer. Do you really want to be responsible for that?

I used my powers to get Russia to sign the nuclear arms reduction treaty in 1987 but it is up to you to chart the course of history now for the good of all mankind. Take heed of Putin's warnings and halt the munitions before it is too late!

March 2023
